Ventless Hood
The Ventless Hood is another joint-effort between Kolb and Giles, which can efficiently purify the polluted air, thus to largely minimize investment for exhausting system building.

Ventless Hood range's proven 3-5 step Air Purification System can efficiently eliminate the grease and odor from the air, it is a more environmental friendly and cost-efficient solution, ideal for all kinds of food processing workshops, restaurants, hotels, bakeries, coffee shops and snack bars, which require no costly ductwork, roof penetration or site modifications. We offer different models and sizes for your selection.
