

# new letter

June 2008

Freshly baked is the expectation of today's customers. All baked goods must be fresh and better just come out from the oven. Our Atoll oven can deliver the needed freshness!

If you think our Atoll 600 does not have sufficient capacity, now you may look at our **Atoll 800** - Its bigger, faster and very reasonable in price. We have recently launched this new and advanced convection bake off oven and a wide range of customers are enjoying its advantages already.

The **Atoll 800** has been introduced in year 2007 for chain customers in South East Asia and has been initially presented to the public on FHA 2008 in Singapore and AHAR 2008 in New Delhi.

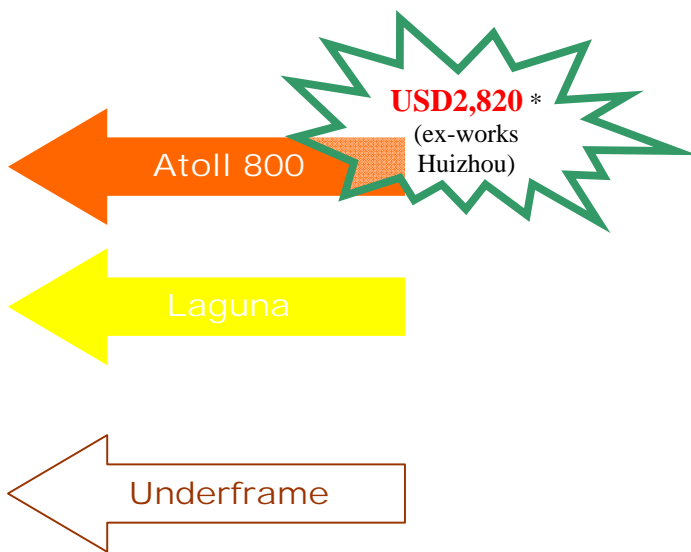

Atoll oven gives bakers high flexibility. You can simply stack up two ovens to double the capacity. It can also be combined with deck oven, underframe or proofer, just depending on your requirement.

The fresher, the better, let us make a demo for you.

With best regards,  
**KOLB H.K. LTD.**
