Precise saw blade guide

3-side saw blade protection

Made in Germany

Roller table

Right / left hand side operation

QUALITY

- Quick tensioning and removable scrapers for safe and fast blade changing
- Perfect cleaning access achieves high hygiene standard
- Completely made of stainless steel meets highest requests

PROTECTION

- Lowerable saw blade protection protects the operator for touching the saw blade
- When starting the saw, the saw blade protection guide will be adjusted to the height of the product
- The protection guides consists of 3-side (all-side) housing

SAFETY

- Brake unit – saw blade stops within 1.8 sec when emergency stop
- After stopping the saw and with closed doors, injuries caused by rotation can be avoided
- High blade tension and stable saw blade guide increases cutting safety for the operator
- Spherically seated sliding table allows safety distance between operators and saw blade
