

Kolb deck oven with built-in integrated elevator in HK bakery café

Load transfer solution for bakeries

Design

- The integrated elevator can fit all types of ovens in height and in width

Save manual effort

- Reducing manual handling of dough, causing unnecessary stress on the final product and increase productivity

Hygiene

- The high position of the system makes it easier to clean the floor and the oven

Easy to use

- The handling loads are compensated by adjustable counter weights.
- The overhead storage position makes it easier to move about and create extra space
