

# Table Top Croissant Moulder

*Do you produce croissants?*

If you do, you'll know that manual curling takes up a lot of time. With our Rondinette curling device, you produce croissants in various sizes – **quickly and efficiently.**

Triangles of dough cut on the cutting table or the Cutomat are simply placed on the infeed belt of Rondinette and loosely curled.

## Rondinette

The table top Rondinette curls the triangles you have produced on the Cutomat or cutting table into loosely curled unfilled croissants.

**Efficient production  
of croissants - Up to 250-300 per hour**

## Table Top Size

Stainless steel housing  
Dimension: 340H x 380W x 580L mm

Weight: approx. 25 kg  
Voltage: 220V/ 1 PH / 50 Hz, 0.3 KW
