

FLOUR SIFTING MACHINE

To eliminate contamination, coarse material and remove lumps from your flour.
Compact, Efficient, Ergonomic design, Mobile with a platform for filling the flour into the hopper.

FLOUR SIFTING MACHINE

Dimension : Width (mm)	1120
: Depth (mm)	700
: Height (mm)	1340
Hopper capacity	35L
Max output per hour	flour 2500kg
Weight	135kg
Power	1.1Kw
Voltage	400
Discharge heigh (mm)	1046

FLOUR HANDLING SYSTEM

Those concerned about raw material quality, take care that the appropriate storage is available.

Silos and tanks come in a variety of versions for all sizes of bakery operations and ensure optimum storage of every type of raw material.

Welded Outdoor Silos

Segment-design, rectangular, indoor silos

Various systems are available including solutions for the discharge of bulk solid with poor flow characteristics

Let us introduce our reference projects to you. Several installations all over Asia!
