

Gelatin Sheet

Bloom 120/160

Package: 5g x 200 pieces

Net Weight : 1,000g

Basic steps for using gelatin sheets:

1. Soak sheets of gelatin in a bowl of cold/iced water for 5 to 10 minutes. (Use about 1 cup/250ml of cold water per sheet.)
2. Once soft, lift sheets from the cold water.
3. Wring gently to remove excess water.
4. Add sheets to room temperature liquid called for in the recipe. Heat the mixture, stirring until the gelatin is dissolved. Do not boil or gelatin will not set. Do not add chilled liquids or mixtures to gelatin after it is dissolved or it will cause uneven setting.
